INTRODUCING MY PATIENT SUMMARY: CUSTOMIZE YOUR PATIENT DATA VIEW

CONNECTICUT'S HEALTH INFORMATION EXCHANGE

What is My Patient Summary?

My Patient Summary will save you time locating regularly viewed patient data within InContext. This feature enables you to customize a unique tab and/or landing page containing self-selected priority data views, so that you can quickly access the data most important to you - without the hassle of excess clicks and toggling through different data tabs.

This editable dashboard eliminates repetitive time spent clicking through InContext looking for the data you most commonly need.

SETTING UP MY PATIENT SUMMARY IS SIMPLE

- Quick and intuitive user design makes setup and ongoing customization incredibly easy
- Capture your most critical and common data tabs in one quickly accessible dashboard
- Display your My Patient Summary view in an at-a-glance or landing page format
- Capture up to 8 data tabs/subtabs and organize their order of display to your preference
- Easy toggle functionality allows for quick access to Search, Filter, and Hide My Organization

Everyone Benefits from My Patient Summary

- Built to accommodate all types of patient data available through InContext
- Quickly access recent encounters, diagnoses and medication lists
- Supports all users from frontline care providers to care coordinators
- Improve efficient understanding of patient history without the hassle
- Streamline access to patient demographics, care teams and social needs
- Reduce technological burden while improving the patient/provider relationship

Make InContext work for you and your needs only. Set up My Patient Summary today and simplify your workflow. Visit www.conniect.org for more information on how to utilize this custom feature.

About Connie

Connie, Connecticut's state-designated Health Information Exchange (HIE) enables the secure and seamless sharing of patient health data with authorized providers and care teams. We are currently leveraging this technology and services to over 1400 users, 1200 organizations and 4.5+ million patients to create a powerful, robust, and equitable healthcare ecosystem in our state. Using an expanding data repository, Connie allows providers to access a patient's complete medical history to improve care coordination, patient outcomes, and clinical decision-making at the point of care. Data privacy and security is a top priority for Connie, and we have applied proven security tools and measures to ensure Health IT protection and compliance best practices from experts. As we continue to collaborate with healthcare providers and organizations, Connie will progress as a statewide advocate, leader, and catalyst for the adoption of essential health information technology and health information exchange services, creating a healthier, more connected Connecticut.
